

# Great Day

Lindsey Buckingham

Long and slender  
Altar in the sky  
And the warm winds blowing  
The river bed was flowing  
A star crossed lover  
Getting hotter and hotter  
I didn't mean to hover  
I just had to love her

Swimming in the water  
I goggle at the moon  
The currents they caught her  
Hiding in my room  
Mirrors in her eyes  
She was wet she was soaking  
Ashes in the ocean  
And her heart was broken

It was a great day, great day  
It was a great day, great day  
It was a great day, great day  
Great day, great day  
It was a great day, great day

The day was dark and burning  
All the time we were learning  
The rules concerning  
Of the corner we were turning  
A wish that is walking  
Is just a crime scene talking  
If it's a plea that you're copping  
It's just a door that you're locking

Great day, great day  
It was a great day, great day  
It was a great day, great day  
Great day, great day  
It was a great day, great day  
It was a great day, great day  
It wasn't such a great day  
It wasn't such a great day  
It was a great day, great day  
It wasn't such a great day
