

## Turn It Around

Link 80

Dire civilization getting high of misery  
Lives wasted away flipping through the channels on TV  
We're taking our time  
And throwing it away  
Tomorrow's killed by yesterday  
Intimidation replacing unity  
Blank generation, community  
More factories are going up  
More people are falling down  
It's up to us to turn it around  
TURN IT AROUND (a lot of times)  
We're rolling down hill and gaining speed  
Snowballing all the way killing everything we see  
We're taught when we're young,  
Don't bite the hand that feeds  
But it covers our ears and shades all we see  
TURN IT AROUND (a lot of times)  
Living in a world made for one  
Lock the door  
Pull the shades  
Kill the sun  
Failures all that I can get right  
An empty hand and a bloody knife  
TURN IT AROUND (a lot of times)
