

# Eternity

Lionel Richie

There is a place for us, for all the world to see  
There is a place out there I know, somewhere, for all eternity.

Here we stand all God's children together, we're trying to see  
where we belong.  
With hills and valleys to conquer, it's time we whether the storm.  
Everybody's looking for something, something they can hold onto  
. We're lost in a sea of confusion. It's hard to know what to do.

There is a place for us, for all the world to see.  
There is a place out there I know, for all eternity.

Where do we go, tell me sisters and brothers.  
How much for what we do to be right? It's time that we look in  
the mirror.  
It's time that we see the same light. I know everybody's searching now.  
Why can't just all get along? It's time that we all come together.  
It's time that we sing the same song.

There is a place for us, for all the world to see.  
There is a place out there I know, for all eternity.

Whoa, yes {Oh, yes, oh yes} The sun will shine oh... {I know, I know}  
For all mankind oh {for all mankind}. Where we can find love oh love!

There is a place for us, for all the world to see.  
There is a place out there I know,  
[Lionel Richie] for all eternity.

There is a place for us, for all the world to see.  
There is a place out there, I know, for all eternity.  
There is a place for us, for all the world to see.  
There is a place, I know, for all eter... eternity... eter... eternity... eter... eternity...
