

## Jump Off

Liquidó

The city explodes tonight, erasing feelings that I used to feel  
throw away the key, all locked up inside  
the bridges will burn tonight, I wanna know what it's like  
to remember all the days we've never had  
I'm burning cold, I'm freezing out, I'm not the same that I used to be  
you and I, bad memories and good times, the jump up to the sky  
together we get high  
we have waited too long, I wasn't trying to impress myself  
all the good things in my life getting away from me  
I'm burning cold, I'm freezing out, I'm not the same that I used to be  
don't turn your back on me, things I couldn't see  
spread your wings and fly over to me, oh my god  
it's everytime the same, feelings without names  
cross your heart and come over to me, oh my god  
the jump off
