

Lay Your Head Down

Liquido

Kiss who you wanna kiss and dance where you wanna dance
say what you wanna say and live how you wanna live
just pull my head out of the screen and it's all good
feed who you wanna feed and play what you wanna play
sing what you wanna sing and taste what you wanna taste
just pull my head out of the screen and it's all good
hell or high water, it's so automatic
watched you turn around, oh no it's not static
lay your head down, come on lay your head down
run where you wanna run and hide where you wanna hide
feel what you wanna feel and drive where you wanna drive
do what you wanna do and take what you wanna take
dance where you wanna dance and say what you wanna say
just pull my head out of the screen and it's all good
break it down, no one can stop us right now
I'm counting on you, count on you
this is the time to do whatever we want
