

Over Me

Lisa Marie Presley

I've seen her face it's okay
It ain't nothing great
Yeah she's cool in a gap toothed
Hippy chick way
I've seen the way you and she
Put on a play
How she plays the part
Much better than I played

Can it be you're over me
She took my place, she saved the day
It's hard to see you're over me
That when she took my place
She saved the day

I've seen that she
She likes to eat
Whatever you make
And how well she can bake that cake
I wouldn't bake
What a breath of fresh air she is
In my way

Can it be you're over me
She took my place, she saved the day
It's hard to see you're over me
That when she took my place
She saved the day

You hope there's no bad blood
You want to be my friend
Uuh, to say hi now and then...
You know there's very bad blood
And I was never your friend, uuh, to say hi

Can it be you're over me
She took my place, she saved the day
It's hard to see you're over me
But when she took my place
She saved the day
