

# Time to Make You Mine

Lisa Stansfield

Only in my dreams  
I've seen the way it's gonna be

I've waited for this moment  
The moment when we share ourselves  
This moment can't be thought about  
It has to be felt

We're closer to each other  
Closer than we've ever been  
Seeing things we've never seen before

I've dreamed your fingers touch me a thousand times  
Dreamed the warm skin of your body burning next to mine  
Kissed your sugar lips, caressed your hips  
Now we're together baby now it's time  
Time to make you mine  
Time to make you mine

The sweet anticipation of hands I know will touch me soon  
Two fascinating shadows move in time

I've dreamed your fingers touch me a thousand times  
Dreamed the warm skin of your body burning next to mine  
Kissed your sugar lips, caressed your hips  
Now we're together baby now it's time  
Time to make you mine  
Time to make you mine

I know what it's gonna be  
Me and you, you and me  
I thought that it would never be  
I only knew it in my dreams  
Even though you're here with me  
I never thought I'd feel such ecstasy

We're closer to each other  
Closer than we've ever been  
Seeing things we've never seen before

I've dreamed your fingers touch me a thousand times  
Dreamed the warm skin of your body burning next to mine  
Kissed your sugar lips, caressed your hips  
Now we're together baby now it's time  
Time to make you mine  
Time to make you mine

I've dreamed your fingers touch me a thousand times  
Dreamed the warm skin of your body burning next to mine  
Kissed your sugar lips, caressed your hips  
Now we're together baby now it's time  
Time to make you mine  
Time to make you mine
