

# This Much I Know

Lissie

The night has to come  
This much I know  
As the light fades out  
The wind begins to blow  
And I am alone and will forever be  
Just me, just me, just me

The silence full of everything  
The silence full of truth  
Life is happening  
Oh oh age and youth  
If I could love you my way  
Then that's all I can do  
And I do, and I do, I do

The past is behind me  
The future don't exist  
The night is inside of me  
And I must live with it

And there's a longing inside me  
Big as the ocean  
'Bout to carry me away  
And wash me over clean  
And I see it in my dreams  
And I know that it's coming  
But when, oh when, oh when

'Cause the past is behind me  
The future don't exist  
The night is inside of me  
And I must live with it

And don't you think I know by now  
Everything I'm supposed to do  
When all the wisdom is up and down  
I open up and let it though

'Cause the past is behind me  
The future don't exist  
The night is inside of me  
And I must live with it

The light has to come  
This much I know  
As the city wakes up  
The sky begins to glow  
And still I am alone  
But I'm never lonely  
'Cause it's me, just me, just me

And the past is behind me  
The future don't exist  
The light is inside of me  
And I must live with it  
Oh and I must live with it  
Oh now and I must live with it
