

Tell me when I get too crazy
And fall in love again
And fall in love again
Maybe it's the way you kiss me
I'll never be the same
I'll never be the same

I think a lot about it
What makes us different
From all the rest of them

Yeah right, right
Everything is alright
It's even better when we're together
Yeah right, right
Everything is alright
It's even better when we're together
Together

Tell me if you think that maybe
We oughta try again
Think we should try again
You think a lot about me
You know I'm better
Than all the rest of them

Yeah right, right
Everything is alright
It's even better when we're together
Yeah right, right
Everything is alright
It's even better when we're together
Together

I drink a lot about you
What makes me do this
With so much left to lose

Right, right
Everything is alright
It's even better when we're together
Yeah right, right
Everything is alright
It's even better when we're together
Together

Right, right
Everything is alright
It's even better when we're together
Yeah right, right
Everything is alright
It's even better when we're together
Together

Yeah right
