Moonshine

I can't remember what it is you did Somewhere along the way I'm giving in I know I feel you when you're not around Just like the angles from underground

What am I trying to say

The thing that I don't get about you The way it makes me feel around you You make the wrong seem right Any old time of night What is it I

I get so nervous when I hear the phone You blocked the number so I never know I can't forget the way you sound And now I can't remember How I did without

What am I trying to say

The thing that I don't get about you The way it makes me feel around you You make the wrong seem right Any old time of night How is it when it rains at nighttime You turn the water into moonshine And make the sun shine light Carry on through the night

I can't remember what it is you did Somewhere along the way I'm giving in I never meant to fall this hard again Good things are all good until the end

What am I trying to say

The thing that I don't get about you The way it makes me feel around you You make the wrong seem right Any old time of night How is it when it rains at nighttime You turn the water into moonshine And make the sun shine light Carry on through the night
