

C'mon

Little Big Town

C'mon, you talking about it around the house
C'mon, oh baby I love to hear your mouth
We have good conversation but you know that's just a fraction
What you won't say about me, is I'm all talk and no action

C'mon, you hear me talking around the house
C'mon, You know you love to hear my mouth
You know we have good conversation, but you know that's just fraction
Are you gonna let me see, are you all talk and no action?

Anything you want, put it on your list
Baby life is like your store and it's alright
Just put it in your cart and I'm the one that would gladly pay and throw in
the day, cause it's your night

I can feel it on your mind (on your mind)
I can feel it on your mind (on your mind)
I can feel it, it's alright (that's alright)
Can you feel it? It's our night

C'mon, you talking about it around the house
C'mon, oh baby I love to hear your mouth
We have good conversation but you know that's just a fraction
What you won't say about me, is I'm all talk and no action

C'mon, you hear me talking around the house
C'mon, You know you love to hear my mouth
You know we have good conversation, but you know that's just fraction
Are you gonna let me see, are you all talk and no action?

C'mon let's hug it out
Come and tell me what the fuss is about
Let's get on every rug in the house
Too late to walk it out
Gonna give you what you talk about
Make the cats and the dog run out
I'm gonna show you what I'm all about
Cause it's our night

C'mon, you talking about it around the house
C'mon, oh baby I love to hear your mouth
We have good conversation but you know that's just a fraction
What you won't say about me is I'm all talk and no action

C'mon, you hear me talking around the house
C'mon, You know you love to hear my mouth
Yeah we have good conversation and you know that's just fraction
Are you gonna let me see, are you all talk and no action?

I can feel it on your mind (on your mind)
I can feel it on your mind (on your mind)
I can feel it, I can feel it, it's alright (that's alright)
Can you feel it? It's our night
