

Good People

Little Big Town

They say you are who you hang with
It's no coincidence I wanna hang with you
Rise and fall together and trouble is better in twos

Sometimes it feels like a magnet
The way that crazy sticks with its own kind
I don't believe in E.S.P. but you can read my mind

Good people know, good people know
Good people
Good people know, good people know
Good people

A good friend would bail you outta jail
But a better one would be handcuffed to you
Everyone's a winner when all the winners lose

Good people know, good people know
Good people
Good people know, good people know
Good people

You can always spot another one when they're nearby
No matter where you look you're gonna find

Good people know, good people know
Good people
Good people know, good people know
Good people

We're guilty by association
Keepin' company with onery company
Runnin' around with rogues
And rounders 'cause we believe

Good people know, good people know
Good people
Good people know, good people know
Good people

You can always spend another one when they're nearby
No matter where you look you're gonna find

Good people know, good people know
Good people
Good people know, good people know
Good people

(Good people, good, good people)
