

Night On Our Side

Little Big Town

Under the cover of darkness falling
We make the rules till day is dawning
Anything can happen underneath the moonlight
Tonight, tonight, tonight the night

Midnight sky overload
Constellations in control
There's too much freedom to just go home
And it's too damn lonely to be alone
Magnetic forces pull us close

Under the cover of darkness falling
We make the rules till day is dawning
Anything can happen underneath the moonlight
Tonight, tonight, tonight the night
Yeah, tonight, tonight, tonight the night is on our side
On our side, yeah

Satellites, you and me
Spinning 'round in circles
Can't get free
Who says you can't defy gravity?
Who says you gotta stay in this galaxy?
Let's start a revolution, let's start a revolution

Under the cover of darkness falling
We make the rules till day is dawning
And anything can happen underneath the moonlight
Tonight, tonight, tonight
Yeah, we've still got a few more miles
Out where love can still be wild
And we might live forever for a little while tonight
Tonight, tonight the night
Yeah, tonight, tonight, tonight the night is on our side
On our side
Let's start a revolution, start a revolution
Start a revolution, start a revolution

Yeah, tonight, tonight
Tonight the night is on our side
On our side
Let's start a revolution
