

# Time For Us

Little River Band

I wouldn't leave it too long, it's a fragile affair  
I wanna tell you what's wrong, but you're never there  
So many nights I wait at home, I climb the stairs and sleep alone  
Every time I reach for you, you reach for the phone, don't you care?

Leave some time for us, find a moment to share  
Leave some time for us, just a minute to spare  
There's still time enough, and I have to believe you still care

Your diary is full of the things that you do  
But I can't find a word about me and you  
I wanna hold you close to me, and feel the way we used to be  
Can't you feel how good we are, when it's just you and me, won't you please?

Leave some time for us, find a moment to share  
Leave some time for us, just a minute to spare  
There's still time enough, and I have to believe you still care

I'd like you to know what I'm feeling inside  
I'd like not to show what I'm trying to hide  
Don't you understand the man I am? I think you should know, I still care

Leave some time for us, find a moment to share  
Leave some time for us, just a minute to spare  
There's still time enough, and I have to believe you still care  
Leave some time for us, just a moment alone  
Leave some time for us, we can turn off the phone  
Just the two of us, two people alone in the world  
Leave some time for us  
Leave some time for us  
Just the two of us  
Leave some time for us
