You really got a good one in You hit me where it hurts Just so you wouldn't get the best of me I fired back somethin' worse

I put you down You show me up

Good for you Good for me Bad for us

We keep goin' around and 'round When's it gonna stop Real love's not a matter of Who comes out on top

I won't back down You won't give up

Good for you Good for me Bad for us

It's a game of who's to blame And we're keepin' score One of us wins the battle We both lose the war

Still we won't say Enough's enough

Good for you Good for me Bad for us

To proud to say Enough's enough

Good for you Good for me Bad for us

Good for you Good for me Bad for us
