

Sing It Over

Little Wings

Sing it over we are older now
And the hills are filled with clover now
Sing it over we are just begun
Sing it over now are race is run
Sing it brighter we are bolder now
Sing the song we're getting older now

With the sunlight on your shoulder now
With the sunlight on your shoulder now
Picking up the new and let it die
Sing it over like a mountain high
Sing it over as we've just begun
Sing the moon and stars and sing the sun
Sing it over as we've just begun

Sing the moon and stars and sing the sun
Oh yeah the mules come closer when the morning has begun
In due time the daylight dawns on days upon us
Sing it over me sultry
Hum my ceiling 'till I'm fast asleep
Find our voices where we left them we'll undress them

Sing the song that we were born to keep
Sing it lastly when the day is done
Sing the solar systems just begun
There are many races left that we will run
Sing it over sing until the sun
Sing it over as the night has come

Sing the wind will give us each a sun
And however we name them nothing chained them
Sing it over we have just begun
Sing it over in our atmosphere
Sing it lower 'till the coast is clear
Their are shapes inside your mind
and you hold it nursing it over now into my ear

Sing it over sing me sultry
Hum my ceiling 'till I'm fast asleep
Find our voices where we left them we'll undress them
Sing the song that we were born to keep
Sing it over sing me sultry
Hum my ceiling 'till I'm fast asleep

Find our voices where we left them we'll undress them
Sing the song that we were born to keep
