Waves of Green

Liv Kristine

Watching the tidals that wash to the shore - I never forget Into these silent waves of all times - eternally

How long may this remain Peace to the land Nature and sea Silent emotions are overcome I wonder how We can go on

Stormy times will we behold? Do we still care What future holds So many words been said undone The waves of green They will flow on

Heal me, free me - dawning is near Where is the saviour - for us to believe As I sit here - on Norge's shores Cries of the unheard - will they be heard The waves of green - whispering my name
