

He Could Teach the Devil Tricks

Live

Yeah you, you really had to start the fight
You really tried to hide the line
You really had to break it up
Why would you break it up?

Now all this time I can hear you say

"I never really saw it coming
I never really saw it coming
I never really saw it coming"

You close your eyes again

Yeah you, you were the mystic and the healing force
All the stars following their course
And yet it takes and blows apart
The fabric of the universe

I can hear you say

"I never really saw it coming
I never really saw it coming
I never really saw it coming"

"I never really saw it coming
I never really saw it coming
I never really saw it coming"

"I never really saw it coming
I never really saw it coming
I never really saw it coming"

You close your eyes again
Close your eyes again
