

Need Tonight

Live

You never thought we'd get this far
The road was closed
You never thought your world would heal
Love would pass you by
The scars of life have cut you deep
But time has a way
Say what you want but I know this love is real

If you believe in it
If you believe in it
If you believe in it
If you believe in it

The herb of life can take so long
But the tide has turned

Say what you want but I know this love is real
If you believe in it
If you believe in it
If you believe in it
If you believe in it

In the line of fire

Say what you want but I know this love is real
If you believe in it
If you believe in it
If you believe in it
If you believe in it

Love's all we need tonight
Love's all we see tonight
Love's all we need tonight
Love's all we see tonight
