## **Girls! Girls! Girls!**

You been around enough to know That if I wanna leave You better let me go

Because I take full advantage Of every man I meet

I get away almost every day With what the girls call What the girls call, what the girls call The girls call murder

You been around enough to see That if you think you're it You better check with me

Because I take full advantage Of every man I meet

I get away almost every day With what the girls call What the girls call, what the girls call The girls call murder
