

# Stars and Planets

Liz Phair

Oh my look at you  
The wide-eyed ingenue  
See me coming  
Whisper something  
Who are you  
Looking through the glass at me  
Like your gonna make it happen  
Let me tell you something true  
You know its just the same old story

Stars rise and  
Stars fall  
But the ones that shine the brightest aren't stars at all  
There are the planets just like us  
And from big to small  
We all shine shine shine  
We all shine

Raise the red flag  
See your hot young available  
Spend their money  
Chase their honey  
Who are you  
boogaloo  
We've seen ten of you  
Just this morning  
At least as pretty too  
You know it just the same old story

Stars rise and  
Stars fall  
But the ones that shine the brightest aren't stars at all  
There are the planets just like us  
And from big to small  
We all shine shine shine  
We all shine shine shine  
We all shine

Everybody wants to go far  
Don't be such a hog in the spotlight  
Try to see how precious you are  
And if you catch that wave it can be death defying

...And if you catch that wave  
It can be death defying  
Blinded by the flash.  
You're in a fashion entertainment affiliated.  
Listener rated pamplona race  
To see who makes it to the Grammys....

Well you better start running  
The bulls are coming  
You know its just the same old story

Stars rise and  
Stars fall  
But the ones that the shine the brightest aren't stars at all

There the planets just like us  
And from big to small  
We all shine shine shine

Stars rise and  
Stars fall  
But the ones that the shine the brightest aren't stars at all  
There the planets just like us  
And from big to small

We all shine shine shine  
We all shine shine shine  
We all shine  
Shine shine shine  
We all shine shine shine  
We all shine shine shine  
We all shine  
shine shine shine  
We all shine shine shine  
We all shine shine shine  
We all shine  
Shine shine shine  
We all shine shine shine  
We all shine shine shine
