

## You Should Know Me

Liz Phair

Not supposed to talk about it  
Analyze it  
We should be there together  
With our hearts in our hands  
We should feel it, come together  
Like the wave meets the sand

Well, you should know me  
Better than that

Not supposed to try and move in  
To dive in  
We should meet there together  
At our pace with our plan  
On dry land, clement weather  
So we both understand

Well, you should know me  
Better than that

(I get down)  
I get up  
(I get angry, I get sad)  
I get angry, I get sad  
Well, I get even a little misty  
When I think of what we had

But you're building a dam where our lives should be  
And you're lying on top of the beauty  
And your closing eyes turn away from me  
Refusing to see who I am

Well, you should know me  
Better than that  
You should know me  
Better than that  
You should know me  
Better than that
