

## Ursa Minor

Lizzy Borden

Out from the night I hear her  
Cry in the dark  
Reminding me in trance of who you are  
Distorted pictures racing through my head  
I look away you vanish into thin air  
So far away - so little time the light is on the way  
So far away - and still no trace of you  
The night will soon be day

Something wicked passing this way comes  
I can feel her laughter chill through my bones  
How can I wait much longer I feel you here  
Revenge is sweetly bitter cold with fear

You disappeared just when I knew you will  
And all that's left is I've obsessed this hell

Ursa Minor I just have to find ya  
I've been searching all night long  
Ursa Minor won't you look behind you  
I can't wait too long

Ursa Minor I just have to find ya  
I've been searching all night long  
Ursa Minor won't you look behind you  
I can't wait too long
