

When you're in love  
Everything feels like it goes your way  
And when you're in love  
Everyday feels like the perfect day  
And I hope that I feel this way forever  
Hope that it's me and you together  
And I don't wanna waste another moment  
It's just me and you girl  
And cupid has done it again

[Hook]

Got my head spinning around and around and around  
And again here we go  
Got my head spinning around and around and around

I don't know  
Where I would be if it wasn't for you  
But one thing's for sure  
I'm so glad that I don't have to be without you  
So I hope that I feel this way forever  
And I hope that it's me and you together yeah  
And I don't wanna waste another moment  
It's just me and you girl  
And cupid has done it again

Got my head spinning around and around and around  
And again here we go  
Got my head spinning around and around and around

Yeah,  
All around, all around  
Got my head spinning round  
All around, all around

It's just me and you girl  
And cupid has done it again  
Got my head spinning around and around and around  
And again here we go  
Got my head spinning around and around and around
