

Ingenious

Lo-Pro

Watching you from a distance
I know what I would say
But you never give me that chance
'Cause you always look away

Ingenious, it's an ingenious little plan
You leave me here, wanting more

Do you know what I did for you
Do you know what you put me through
With all the things I do
I could never live up to you
Do you know what it means to me
Do you know what it does to me
I know I will always be
Just a person you'll never stand
I came up with the perfect plan
I thought you would understand
But you wouldn't give me a chance
Just a victim of circumstance
What was I supposed to do
I shouldn't have run from you
I didn't have a clou
Now I'm in this deep because of you

You never knew I existed
You're the one that always steps away
You're all I could think of
You kept me awake

Ingenious, it was an ingenious little plan
You left me here, and I want more

Do you know what I did for you
Do you know what you put me through
With all the things I do
I could never live up to you
Do you know what it means to me
Do you know what it does to me
I know I will always be
Just a person you'll never stand
I came up with the perfect plan
I thought you would understand
But you wouldn't give me a chance
Just a victim of circumstance
What was I supposed to do
I shouldn't have run from you
I didn't have a clou
Now I'm in this deep because of you

I'm in this deep because of you
I'm in this deep because of you
I'm in this deep because of you
I'm in this deep because of you
I'm in this deep because of you

Do you know what I did for you

Do you know what you put me through
With all the things I do
I could never live up to you
Do you know what it means to me
Do you know what it does to me
I know I will always be
Just a person you'll never stand
I came up with the perfect plan
I thought you would understand
But you wouldn't give me a chance
Just a victim of circumstance
What was I supposed to do
I shouldn't have run from you
I didn't have a clou
Now I'm in this deep because of you

Now I'm in this deep because of you
Now I'm in this deep because of you
