

We'll Make It... I Know We Will

Lobo

Come on girl get aboard this bus
It's pretty crowded but there's room for us
It seems everybody here sees the beckoning light
Come on girl we'll be there Thursday night

The other side of the mountain
The greener side of the hill
A world is there for us to share
We'll make it I know we will

So come on girl get aboard this train
It's just about time we came out of the rain
We'll be stopping off in Lodi
But we won't be staying long
Come on girl we're going where we belong

So come on girl get aboard this dream
Only you know what it really means
When we get there you'll wash your hair
And let it dry in the sun
At the edge of the stream watching water run
