

## Forest Eyes

Logh

You're so very late but I'm glad you came  
This city has eyes  
They keep me up at night  
There's somebody there with eyes that stare  
At night I dream a sleepless dream

Small, hungry points of light surrounding me on every  
Side  
Like a forest at night this city has eyes  
From somewhere outside they pan my walls like  
Searchlights another night without sleep and another day  
Without dreams

It's dark outside  
It's almost night  
The nights, they're all alike  
They'll show when I close my eyes  
For now I'll just sit tight
