

Mechanic Of Your Heart

Loick Essien

Symptoms of being scared
Feeling cold
Feeling lonely
On your own

I can feel it's fear
Keeping strong
And it's taking over
I'm loosing control

And if you are not religious
Then how will you get far believe
And when I don't know procedures
Then how am I meant to proceed

To mend your heart
To mend your heart
To mend your heart
To mend your heart
I try my best to operate on you oh oh oh
Trying to learn the mechanics of a heart

Broken heart
Torn apart
Put the stuff on the floor
Smashed into pieces

First he hurt her
And then he desert her
But I'm trying to save it
Before your heart teases

And if you are not religious
Then how will you get far, believe
And when I don't know procedures
Then how am I meant to proceed

To mend your heart
To mend your heart
To mend your heart
To mend your heart
I try my best to operate on you oh oh oh
Trying to learn the mechanics of a heart

I try my best to operate on you oh oh oh
Trying to learn the mechanics of a heart

I try my best to operate on you oh oh oh
Trying to learn the mechanics of a heart

I try my best to operate on you oh oh oh
Trying to learn the mechanics of a heart

To mend your heart
To mend your heart
To mend your heart
To mend your heart
