

Good Night White Pride

Loikaemie

You pick on the weak
You're only strong in groups
Can't do shit on your own
You pick on those who are few
Right winged scum
You have no place in our scene
Right winged scum
We'll teach you what skinhead really means

You're the sickness of our generation You've infested almost every nation
You're the plague of our society You're our most hated enemy

Listen what we have to say: Good night white pride
Only what we have to say: Good night white pride

Good night, good night, good night, good night white pride
Good night, good night, good night, good night white pride
