

London Nights

London Boys

Give a little love - and love last forever
Give a little love - and don't make me cry
Give a little love - if you lose the motion
Give a little love - with you it's goodbye
Give a little love - the plane that is leaving
Give a little love - our hearts on the ground
Give a little love - where music is leading
Give a little love - the lost and the found.

We let live and let love live beside us
we're like everybody else who live to guide us
If there's hope and love across the nation
everybody find a recreation.
London nights - when the party's out and the fever drives you

London nights - when the party's out and the fever drives you
London nights - when the party's out and the fever drives you wild.
when the party's out and the fever drives you.
I wanna get up tonight
I wanna keep on loving you

I got a feeling that's right
I wanna give you all my love for you.
Give a little love - I walk through the city
Give a little love - there's food in the air
Give a little love - hello
Piccadilly
Give a little love - the wind in my hair
Give a little love - the beat of tomorrow
Give a little love - from Rome to L.A.
Give a little love - just move a bit closer
Give a little love - d'you hear what I say ?

We let live and let love live beside us
we're like everybody else who live to guide us
If there's hope and love across the nation
everybody find a recreation.
London nights - when the party's out and the fever drives you

London nights - when the party's out and the fever drives you
London nights - when the party's out and the fever drives you wild.
when the party's out and the fever drives you.
I wanna get up tonight
I wanna keep on loving you

I got a feeling that's right
I wanna give you all my love for you.
If there's hope and love across the nation

everybody find a recreation.
London nights - when the party's out and the fever drives you
London nights - when the party's out and the fever drives you
