

# I Just Want to Love You

Lonestar

Baby come sit down beside me  
I wanna hear all about your day  
There was a pile up on the interstate  
I'm sorry that I got home so late  
I thought about you all the way home  
Can we leave the TV off tonight  
Unplug the phone

I just want to love you  
More than anything else  
More than life itself  
More than ever baby  
I just want to hold you  
Touch the heat on your skin  
Again and again and again  
Let's shut out the world, dim all the lights  
Baby tonight  
I just want to love you

We can a couple candles  
And watch the shadows dance on the wall  
While we're moving through the silence  
To the rhythm of our own song  
I don't wanna fall asleep tonight  
Don't wanna think about tomorrow  
Baby I

I just want to love you  
More than anything else  
More than life itself  
More than ever baby  
I just want to hold you  
Touch the heat on your skin  
Again and again and again  
Let's shut out the world, dim all the lights  
Baby tonight  
I just want to love you
