

Facing defeat after defeat  
Sacred hopes vanished in haze  
But with your mother we stood as one  
It didn't kill us it made us strong  
We walked through hell, but we came back  
An iron faith leading our heart  
Nothing could destroy this will  
And we fought 'til victory

Welcome Vikroria, you are my flesh, you are my blood  
Welcome Viktoria, angel of light, you are my pride  
Welcome Viktoria, you are my flesh, you are my blood  
Welcome Viktoria, angel of light, you changed my life

The hallowed day of your birth  
The fight seemed lightyears away  
In the moment you saw the light  
the darkened spell was slain  
Now I feel like a wolf  
I'm the guardian of the pack  
No one shall do you harm  
I'd kill the one who'd mistreat you
