

## Wild and free

Lonewolf

There is a flame and it's burning bright  
Deep in our hearts and it can't be tamed  
We know well what we want from life  
We'll stand the fight together we are strong

Stand tight now

See the fire burns in our eyes  
We don't give a damn of what you say  
'Cause our heart leads our way  
Wild & free

Freedom & love not izorace & hate  
The way you guide your moralistic size  
It leads to nothing but a golden cell  
You burn your wings before you learn to fly

Stand tight now

Lust for life heats in our hearts  
Not trendy assholes our rights we claim  
We'll never go astray  
Wild & free

The lust and flame are forced in iron  
We don't give a fuck of the way you see  
Metalheads Proud we stand
