

# Tidal Wave

Longwave

Take me down in a tidal wave  
Take me down when I'm wired  
The hardest thing you ever gave away is the hardest thing to keep  
I am everything you wanted, I am everything you wanted  
I am everything you need  
Take me back to the other place  
Take me back when I'm alone  
I can see all the little things that once could make me whole  
I am everything you wanted, I am everything you wanted  
I am everything you need

But I can feel it again, I can feel it again  
I am everything you wanted, I am everything you need

Give me the colours of a different light  
Give me the colours grey and blue  
Everything you ever hoped to be is when the colours breathe  
I am everything you wanted, I am everything you wanted  
I am everything you need

But I can feel it again, I can feel it again  
I am everything you wanted, I am everything you wanted  
I am everything you wanted

Everything you wanted, everything you wanted, everything you wanted
