

All my life

Loona

Every night on my own I've been waiting
Believing that you made my life complete
Now is the moment to tell you it's over
You don't deserve so go out and leave

It's over now can t you see,
That you are not the one for me
So baby it s over now
Take your key, I don't need you anymore

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

Why didn't I notice it were
Lies that you told me
You blinded me and sold all your dreams to me
Now it's too late, no, don't tell me you love me
You dont deserve me so go out and leave

It's over now, can't you see,
That you are not the one for me
So baby it s over now take your key
I don t need you anymore

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

Every night on my own I've been waiting
Believing that you made my life complete
Now is the moment to tell you it's over baby
You don't deserve so go out and leave

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

All my life how could I've let
You get into my heart
All my life I know that
Without you I will survive

All my life how could I've let

You get into my heart
All my life I know that
Without you I will survive
