Six Feet Underground

Lord Of The Lost

I said in good times as in bad In light as in darkness From the first kiss to your last breath In light as in darkness

But too much is never enough I'm digging my way to my work of art

Deep down in the dark Loving you six feet underground Enternal love So cold from your frozen heart

Deep down in the dark Loving you six feet underground Enternal love I'm loving you six feet underground

I kiss you bleak lips part by part In light as in darkness My favorite pieces à la carte In light as in darkness My love will last longer than death And night by night you'll be my skin and flesh

Deep down in the dark Loving you six feet underground Enternal love So cold from your frozen heart

Deep down in the dark Loving you six feet underground Enternal love I'm loving you six feet underground

But too much is never enough I'm digging my way to my work of art

Deep down in the dark Loving you six feet underground Enternal love So cold from your frozen heart

Deep down in the dark Loving you six feet underground Enternal love I'm loving you

Deep down in the dark Loving you six feet underground Enternal love So cold from your frozen heart

Deep down in the dark Loving you six feet underground Enternal love I'm loving six feet underground Deep down in the dark I'm loving six feet underground
