

# The Deadite Girls Gone Wild

Lordi

She lures you in with intention  
Looks like the girl next door  
But it's blood and sticky floors  
That really turn her on

She's got a body to die for  
You touch it and you will  
She's got a face of an angel  
And an urge to kill

She's sanctified by death

Hey! Stay away from the lady night  
Hey! Don't you mess with the devil's bride  
You gotta pull out!  
Can't you feel the darkness falling?  
Get the hell out!  
Can't you hear the heaven's roaring?  
The Deadite girls gone wild

Have casket will travel  
She's the best of the worst  
She'll chew on your neckbone  
To quench her thirst

The black widow entraps you  
Oh boy, you're in for a treat  
She's the queen of beasts  
She's a demon in heat

She's sanctified by death

Hey! Stay away from the lady night  
Hey! Don't you mess with the devil's bride  
You gotta pull out!  
Can't you feel the darkness falling?  
Get the hell out!  
Can't you hear the heaven's roaring?  
The Deadite girls gone wild

No, don't thank heaven for little girls, no  
When their eyes turn white as pearls  
You wanna put it inside  
You're gonna lose it, she bites  
Then she'll suck you dry

Then she'll suck you dry...

Hey! Stay away from the lady night  
Hey! Don't you mess with the devil's bride  
You gotta pull out!  
Can't you feel the darkness falling?  
Get the hell out!  
Can't you hear the heaven's roaring?
