

# Crying Out Your Name

Loreen

I've emptied out the minibar  
Did it all by myself  
About to go and key his car  
Yeah-yeah, I'm what you call a mess

I can't remember what went wrong  
I started talking to myself  
I even hate my favourite song  
What would a damsel in distress?

And if you ask me where I'm gonna be tonight  
Ask me if I'm gonna be alright, I

I'll be crying out your name  
Drink through all this pain tonight  
I don't even wanna fight  
I know when the battle's lost

I'll be crying out your name  
Drink through all this pain tonight  
You and I were never right  
I know when the battle's lost

The painful things you did to me  
I'll do them all to someone else  
And that is how it's gonna be  
It takes a lot of self defence

So don't you ask me where I'm gonna be tonight  
Don't ask me if I'm gonna be alright, I

I'll be crying out your name  
Drink through all this pain tonight  
I don't even wanna fight  
I know when the battle's lost

I'll be crying out your name  
Drink through all this pain tonight  
You and I were never right  
I know when the battle's lost

Nothing really matters when the lights go out  
Stumbling into the dark  
Everything is shattered  
I'm not picking up the pieces of my broken heart

I'll be crying out your name  
Drink through all this pain tonight  
I don't even wanna fight  
I know when the battle's lost

I'll be crying out your name  
Drink through all this pain tonight  
You and I were never right  
I know when the battle's lost
