

Lip Service

Lorene Drive

I'll try and cover all the bases
Something to really kill my reputation
All buttoned up, ready to go
Forget tonight, forget everything you know

A little light weight lip service
To get me through the night
I'm so tired of going to sleep
To the sound of your teeth...

I can't believe you saw truth naked
(Ha-ha, I faked it)
Another way to really kill my reputation
All buttoned up, ready to go
Forget tonight, forget everything you know

A little light weight lip service
To get me through the night
I'm so tired of going to sleep
To the sound of your teeth grinding

And I've been wrong before
And I've been right
I've never felt so right about nothing besides,
How you and me will never work out
(Never, never, never say)

A little light weight lip service
To get me through the night
I'm so tired of going to sleep
To the sound of your teeth grinding

And I've been wrong before
And I've been right
I've never felt so right about nothing besides,
How you and me will never work out, yeah!
