

Still in the Ring

Loretta Lynn

So I finally met the other woman and I see that what I heard is true
You could hit a man right where his heart is you're a beauty and a fighter too
Now you say you're gonna take him from me you'll win the title of his wife
I can see you've done a lot of trainin' but you're in for the fight of your life

You may be quiet and knockout oh but don't you forget one thing
You only won the first round his finger is still in the ring

So you slipped around and found his weakness and you knocked him down a time or two
You moved in close and took advantage now you think that he'll move in with you
Well tonight I'm lying in his corner and love is gonna change some things
You'll find out when the fight is over his finger is still in the ring

Oh you may be quiet and knockout oh but don't you forget one thing
You only won the first round his finger is still in the ring
You only won the first round his finger is still in the ring
