

Where Do Babies Go

Loretta Lynn

My little boy tried shavin' for the first time today
My little girl said mama I love Paul
It's been no time since he was Daniel Booney
And she'd wear my high heels to make her tall

He'd bring to me a trinket from a box of cracker jacks
And she a weed as if it were a rose
I used to wonder where do babies come from
But now I wonder where do babies go

Where do babies go without us knowin' that they're gone
Time pays no mind to how fast children grow
I used to wonder where do babies come from
And now I wonder where do babies go

Where do babies go without us knowin' that they're gone
Time pays no mind to how fast children grow
I used to wonder where do babies come from
And now I wonder where do babies go
