

Fall In The Light

Lori Carson

It's in this moment, hold on
And everything has come apart
It's in this moment, right now
When it can come together

Raise your sights
What's there to lose?
Fall in the light
Fall in the light
Fall in the light

In all this trouble, hold on
To the innocence with which you were born
There's so much struggle, be strong
Find the faith you need to carry on

It's a long night
You're not alone
Fall in the light
Fall in the light

Sweet falls into place
Sun through the haze
Doesn't it feel a little like grace

It's in this moment, hold on
When everything has come apart
It's in this moment, right now
When everything, come together

Raise your soul
What's there to lose?
Fall in the light
Fall in the light
Fall in the light

Hold on, hold on, hold on
I know you'll catch me
