

Starlight

Lori McKenna

The dog is barking the coffee is cold
And I didn't sleep last night
The say is still young but I'm one more day old

Those kitchen towels used to be white

Oh starlight star bright
What the hell happened to you
I've wished and wished night after night
But none of them ever come true
You must be broken too

The church bell ain't ringing the stop light is stuck
And I'm in the same shape that they're in
All the pieces are there and I would pick 'em up
If I could put myself together again

Oh starlight star bright
What the hell happened to you
I've wished and wished night after night
But none of them ever come true
You must be broken too

The sun will go down and the clouds will roll out
One more shot what have I got to lose
If you promise you'll never give up on me
I'll never give up on you

Oh starlight star bright
First star that I see tonight
I wish I may I wish I might
Have the wish that I'm wishing tonight
