## **Round And Round**

Los Lobos

Round and round and up and down and round and round and Rollin', rollin' I don't know Never ends and never ever wants to let me go When over you comes waves of blue Have no fear 'Cause I'll be right here beside you Round and round and up and down and round and round and Dizzy, dizzy 'till I can't see Stumbling in the dark Reaching out, reaching out For someone to hold me I'll be your eyes to give you sight If you fall If you do fall into that night Round and round and up and down and round and round and What will I do if I can't see you? I can't touch you I can't even hear you calling my name Heart to heart Soul to soul Heart to heart we can't be wrong Soul to soul in this small corner of the earth We can be strong Round and round and up and down and round and round and Rollin', rollin' I don't know Never ends and never ever wants to let me go When over you comes waves of blue Have no fear 'Cause I'll be right here beside you Round and round and up and down and round and round and Dizzy, dizzy 'till I can't see Stumbling in the dark Reaching out, reaching out For someone to hold me I'll be your eyes to give you sight If you fall If you do fall into that night Round and round and up and down and round and round and What will I do if I can't see you? I can't touch you I can't even hear you calling my name Heart to heart Soul to soul Heart to heart we can't be wrong Soul to soul in this small corner of the earth

We can be strong Tištěno z www.txp.cz
