

## Just Kids

## Lost Years

I was walking down main street to the corner stone  
To get my cigarettes and to pick my poison of the day  
I was walking down main street to the county fair  
To see all the people that I never wanted to see but  
The fireworks reminded me of when I was just a kid and  
Now were doing all the things that we'll never say we did  
And the fire in those brown eyes were telling me  
"if you ever stop then I'll never finish"  
And we were still just kids

We were taking long drags and breathing smoke  
We were the young and the restless and invincible  
Stayed up all night, we were the kings and the queens  
Of the shorelines. Now we're getting older and doing all  
The things that we said we'd never do but we did em and  
We did them well

And the fireworks reminded me of  
When I was just a kid and now were  
Doing all the things that we'll never say  
We did and the fire in those brown eyes  
Were telling me "if you ever stop then I'll  
Never finish" and we were still just kids

Basking in the sunlight  
Staying out past midnight  
We were the coolest kids  
And we took it all in stride

We were taking long drags and breathing smoke  
We were the young and the restless and invincible  
Stayed up all night. We never wanted to fight when  
We were just kids
