

Somedays

Lostprophets

All along I thought no one ever took me seriously
I've stayed strong even though mostly I felt weak
Time moves on never stopping to enjoy the sights of people
I've proved wrong dancing to these symphonies

Some days it feels like I'm still getting nowhere
Walking these circles round and round
I've never been the one to turn my back or let you fall through
Those cracks under your feet, I'll help you off the ground

Some days are good
Some days are tough
Some days these dreams just ain't enough
But when you're here with me that's all I need
Sometimes we laugh
Sometimes we scream
But we still run to chase these dreams
But when you're here with me that's all I need

Chase away the days just so we can spend these nights together
Making plans for all the things left to achieve
Love like waves always crashing down around us yeah
We drift away at the exact time that we meet

Some days it feels like I'm still getting nowhere
I walk in circles round and round
I've never been the one to turn my back or let you fall through
Those cracks under your feet, I'll help you off the ground

Some days are good
Some days are tough
Some days these dreams just ain't enough
But when you're here with me that's all I need
Sometimes we laugh
Sometimes we scream
But we still run to chase these dreams
But when you're here with me that's all I need

That's all I need yeah
You're all I need

Some days are good
Some days are tough
Some days these dreams just ain't enough
But when you're here with me that's all I need
Sometimes we laugh
Sometimes we scream
But we still run to chase these dreams
But when you're here with me that's all I need

That's all I need
That's all I need
That's all I need
That's all I need
