## **Lost In The Shadows**

## Lou Gramm

Say hello to the night Lost in the shadows Say hello to the night Lost in the loneliness Say hello to the night Lost in the shadows No one knows

I can't wait, I can't wait, no When I see little lights in the shadows One must hide when the sun gets higher I don't know what this madness means

Here comes the night The bedroom in shadows Candlelights I don't know where it's coming from But I, I keep moving on Till the darkest thought makes me want to try these wings

Say hello to the night Lost in the shadows Say hello to the night Lost in the loneliness Say hello to the night Lost in the shadows No one knows

Loneliness pours over you Emptiness can pull you through Did you go to sleep with the light on? I can't wait for this feeling to free me

Wind blows hard, but it doesn't matter 'Cause when the sun goes down Nothing else matters The line is where the night lies I will wait outside her window tonight

Say hello to the night Lost in the shadows Say hello to the night Lost in the loneliness Say hello to the night Lost in the shadows No one knows

Loneliness pours over you Emptiness can pull you through Did you go to sleep with the light on? I can't wait for this feeling to free me

Say hello to the night Lost in the shadows Say hello to the night Lost in the loneliness Say hello to the night Lost in the shadows No one knows
