

Tin Soldier

Lou Gramm

I am a little tin soldier, that wants to jump into your fight
You have a look in your eyes, like a dream passing by in the night

But I don't understand, when all I need, is treat me like a man
Because I ain't no child, you take by the hand

I've got to know that I belong to you, do anything that you want me to

Sing any song that you want me to, sing to you

I don't need no complication, I've just got to make you, got to
, got to listen

I've just got to make you, in this confrontation

I've got to know that I belong to you, do anything that you want me to

Sing any song that you want me to, sing to you

All I need is your whispered hello, smiles melting the snows of
the hurt

Your eyes are deeper than time, say a love that won't last without words

So now I've lost my way, I need you to show me things to say

So give me your love, before mine fades away

I've got to know that I belong to you, do anything that you want me to

Sing any song that you want me to, sing to you

All I want is some reaction, someone to give me satisfaction

All I want to do is prove to you, that I love you
