

All We Are

Lou Rhodes

Your kiss finds me out
Nothing left to hide
Plunging the depths of me
And when our bodies join
It's like two galaxies collide
What greater love could there be

So talk to me of love and all you fear
I wanna give you everything
'Cause heaven brought us here
To love with all we are

We find a place beyond time and space
Too big to ever quite contain
I know the moment that I saw your face
All the twists and turns that led me here
Were not in vain, oh not in vain

So talk to me of love and all you fear
I wanna give you everything
'Cause heaven brought us here
To love with all we are

Talk to me of love and all you fear
I wanna give you everything
'Cause heaven brought us here
To love with all we are
All we are

Talk to me of love and all you fear
I wanna give you everything
'Cause heaven brought us here
To love with all we are
