It All

Lou Rhodes

Is it worth your white To step out of line Go the extra mile In this space and time

Or you can just close your eyes to it all Curl up and die to it all You can just close your eyes to it all Say your goodbyes to it all

"Is this all there is" I hear you say Well think of all you miss Every day

Or you can just close your eyes to it all Curl up and die to it all You can just close your eyes to it all Say your goodbyes to it all

What if that's all there is Wake up, wake up to what you miss

And you can just open your eyes to it all Breathe in the sky of it all You could open your eyes to it all Just for the high of it all
